

Talha Çelik

Eindhoven, NL | celikt2002@gmail.com | [LinkedIn](#) | [GitHub](#)

Graduated Computer Science & Economics student with strong analytical and programming skills. Interested in applying AI and automation to improve workflows and support data-driven decision making. Experienced with Python, AI agents, and Agentic RAG designs, building practical solutions to real-world problems. A clear communicator who enjoys translating technical ideas into simple tools that help teams work more efficiently.

EXPERIENCE

ASML

Sep 2026 – Feb 2027

Agentic AI Intern — Business Analytics

Veldhoven, NL

- Identifying and validating agentic AI opportunities that remove repetitive tasks and support decision making within the Reuse & Repair Analytics team.
- Prototyping and testing AI agents using Copilot Studio, Agent Builder, and Python, translating user needs into clear agent requirements.
- Building demos, onboarding materials, and guidance, and tracking agent performance with data analysis tools.

Capgemini

Feb 2026 – Jul 2026

Integration Engineering Intern

Utrecht, NL

- Contributing to enterprise system integration and migration projects.
- Researching intelligent AI agents for legacy-to-modern system transformation.
- Designing & implementing an intelligent agent with RAG solutions for automated schema mapping.

STIP Student Regional Coordinator

Sep 2021 – Current

- Provided guidance and support through coaching and mentoring, helping students reach their full potential.
- Built strong relationships with youth by applying exceptional interpersonal and communication skills.
- Provided organizational support, organizing activities and resolving administrative challenges.

EDUCATION

Tilburg University

Sep 2026 – Jul 2027

MSc Data Science and Society

Tilburg, NL

Fundamentals of Data Science, Statistics, Machine Learning, Big Data, AI in Business, Data Science in Finance, Data Mining.

Leiden University

Sep 2022 – Jun 2026

BSc Computer Science & Economics

Leiden, NL

Programming (Python), Algorithms & Data Structures, Databases (SQL), Machine Learning, AI for Business, Data Science, Software Engineering, Security, Statistics, Micro/Macro-economics, Financial Management, Business-IT alignment.

SKILLS

- Programming: Python, SQL
- AI Agents, Automation, Agentic RAG architectures,
- LLMs, GenAI concepts, NLP fundamentals
- Machine Learning; strong mathematical & statistical foundation
- Integration (Boomi), Power BI, Azure AI Foundry, Copilot Studio
- Agile (Scrum) collaboration; digital problem solving & critical thinking
- Languages: English, Dutch, Turkish
